

Badejo Ayotayo Patrick

Frontend Software Engineer

ayotayobadejo@gmail.com · +2348130237778 · gmail.com · gmail.com · linkedin.com/in/badejo-ayotayo-24118b251

PROFESSIONAL SUMMARY

Frontend Software Engineer with 4+ years of experience building responsive, accessible web and mobile applications using React.js, Next.js, and modern frontend tooling. Specializes in translating complex UI/UX designs into clean, reusable component-driven architectures that scale across desktop, tablet, and large-screen displays. Experienced in integrating REST APIs, handling state management, and implementing role-based UI rendering. Proven ability to collaborate with design and backend teams, enforce engineering standards, and optimize application performance for real-time data visualization.

SKILLS

HTML · CSS · JavaScript · TypeScript · React.js · Next.js · Node.js · React Native · REST API Integration · GraphQL · MongoDB · MySQL · Git · Redux Toolkit · Context API · WebSockets · MQTT · Role-Based UI Rendering · Component-Based Architecture · Responsive & Accessible Design (WCAG) · Agile Methodologies · Chart.js · Recharts · Real-Time Monitoring UI · Real-time Dashboards · Performance Optimization

EXPERIENCE

Frontend Engineer Lead (Web)

12/2024 – 10/2025

Fivani · London

- Architected high-performance React.js applications with optimized state management via Redux Toolkit, reducing page load times by 45% and establishing reusable component libraries to streamline frontend development.
- Transformed frontend architecture by integrating React Hooks and Context API, cutting code complexity by 35% and accelerating feature delivery cycles.
- Unified design and engineering workflows by partnering closely with UI/UX Design Leads to translate specifications into pixel-perfect, accessible, responsive interfaces aligned with WCAG standards, driving a 40% increase in customer satisfaction.
- Conducted structured code reviews to uphold component-based engineering standards and mentor junior developers in building accessible, high-performance interfaces.

Frontend Engineer (Web and Mobile Apps)

05/2024 – 08/2025

Limestone · Lagos, Nigeria

- Led cross-functional teams to build intuitive, responsive interfaces consuming REST APIs, boosting user engagement by 40% and improving application scalability by 50% across desktop and mobile screens.

- Automated pension fund workflows through frontend integration with backend services, delivering production-grade software aligned with strict organizational compliance and role-based access requirements.
- Streamlined version control by introducing structured Git branching strategies, reducing code conflicts by 50% and accelerating deployment cycles by 60%.
- Partnered with QA teams to design and execute comprehensive test plans, achieving a 40% reduction in post-release bugs and a 30% improvement in overall application stability.
- Developed real-time React ai chat dashboard using WebSockets to stream chats with minimal latency.

Frontend Engineer

12/2023 – 05/2024

NLPC PFA · Lagos, Nigeria

- Spearheaded the development of accessible, responsive web applications in React that consumed REST API endpoints, increasing user responsiveness by 20% and reducing page load times by 30%.
- Drove a 25% increase in user engagement by delivering intuitive, UI/UX-sensitive interfaces built to web accessibility and scalability best practices.
- Established Git-based codebase management protocols, cutting code conflicts by 20% and accelerating deployment timelines by 30%.
- Collaborated with QA engineers on thorough regression and functional testing cycles, reducing post-release defects by 25% and improving application stability by 15%.

Fullstack Developer / Instructor

08/2021 – 05/2023

NUPAT Technologies · Lagos, Nigeria

- Pioneered the frontend build of a student learning platform, engineering immersive, device-adaptive interfaces (desktop and tablet) that increased user involvement by 20% through iterative Agile development cycles.
- Engineered cross-browser-compatible, responsive web pages supporting all major browsers and mobile devices, boosting website traffic by 25% and user engagement by 15%.
- Overhauled UI components for accessibility and usability through Agile feedback loops, raising overall project compliance by 30% and cutting client-reported issues by 20%.
- Mentored student developers on frontend fundamentals, debugging techniques, and cross-browser compatibility standards, reinforcing high engineering output across cohorts.

EDUCATION

Bachelor of Science in Political Science and Education

2017 – 2021

2017 – 2021

Tai Solarin University of Education

Advanced React / Web Development

2021 – 2022

2021 – 2022

Udemy
